## EXPERIENCE

### EpicWise

AI Founding Engineer Intern

Remote (Canada Startup)

May 2026 – Present

- Working directly with the founding team on the core EpicWise context engine, designing multi-step retrieval and reasoning pipelines using **LangGraph**.
- Built EpicWise's public **MCP server**: authentication, authorization, an agent harness testing agent, and a requirement-analysis agent.
- Built hybrid retrieval combining vector search (**Pinecone**) and graph-based retrieval (**Neo4j**); authored system prompts, execution routers, and tool-calling schemas.
- Built internal tracing/observability tooling using **Langfuse** and structured logging to monitor agent runs in production.

### FaxLab

Frontend Developer Intern

Remote

Feb 2026 – Mar 2026

- Built the UI for an AI course platform (Next.js, TypeScript, Tailwind), improving the learning experience for **50K+ active learners**.
- Replaced hardcoded data with Graphy's REST APIs; implemented SSR + code splitting, cutting page load time by **30%** and bundle size by **22%**.

### GRS Worker

Full Stack Developer Intern

Remote

Sep 2025 – Nov 2025

- Built scalable backend using Node.js, Prisma, PostgreSQL with Redis caching and secure authentication.
- Reduced data errors by **40%** using Zod validation and structured service-layer workflows.
- Integrated Twilio + QR systems; containerized and deployed all services using Docker with CI/CD pipelines.

## OPEN SOURCE

### Joplin (54K+ GitHub Stars)

[Contributions](#)

- Fixed core issues across desktop, mobile, and sync engine (React, Electron, Node.js); delivered **merged and approved PRs**.
- Collaborated directly with maintainers on a large-scale real-world codebase; followed structured PR review workflows.

## PROJECTS

### Buildify Labs, Agentic AI Business Intelligence

[Live](#) | [GitHub](#)

Next.js, FastAPI, LangGraph, Pinecone, Groq

- Built agentic AI platform using **LangGraph** (ReAct pattern) converting natural language into dynamic dashboards.
- Designed **RAG pipeline**: document embeddings, Pinecone vector search, structured JSON, real-time UI rendering.
- Implemented **short-term + long-term memory** with session state and context window management for multi-step queries.

### RepoGraph AI, VS Code Extension

[Live](#) | [GitHub](#)

TypeScript, VS Code API, Groq, Ollama, Gemini, Anthropic, OpenAI

- Built a VS Code extension that scans workspaces and maps every file relationship into an interactive force-directed **dependency graph**.
- Integrated **5 AI providers** (Groq, Ollama, Gemini, Anthropic, OpenAI) with custom model support and zero telemetry.
- Implemented a multi-turn Q&A agent with full graph, summary, and file context, plus smart filtering across 20+ languages.

### MyAttendance

[Live](#) | [GitHub](#)

Next.js, MongoDB, Redis, PWA

- Built PWA used by **1300+ users** with role-based access control and optimized MongoDB queries for high concurrency.
- Implemented Redis caching layer reducing DB load; added structured error logging for production monitoring.

### Postly, Real-time Social App

[Live](#) | [GitHub](#)

Node.js, Socket.io, MongoDB, Kafka

- Built real-time event-driven backend using Socket.io + Kafka message queue; implemented JWT auth and async data processing.
- Designed modular service-layer architecture with scalable API design patterns and live data update subscriptions.

## AI EXPERIENCE

- Agentic Systems**: LangChain, LangGraph; ReAct & Plan-Execute patterns; tool calling; multi-step reasoning workflows.
- RAG & Retrieval**: Embedding models, Pinecone/FAISS vector DBs, semantic search, context & memory management.
- LLM Systems**: OpenAI/Gemini/Anthropic APIs with structured outputs, prompt engineering, state handling in AI workflows.
- MCP**: Designed and built MCP servers/integrations: auth, authorization, agent harness testing, requirement-analysis agents.

## EDUCATION

### Harcourt Butler Technical University, Kanpur

Bachelor of Technology

2023 – 2027

## TECHNICAL SKILLS

**Languages**: JavaScript/TypeScript, Python, SQL, C++

**Frontend**: Next.js, React, Tailwind, Zustand

**Backend**: Node.js, Express, FastAPI, Prisma, REST/GraphQL, Kafka, Redis

**AI/ML**: LangChain, LangGraph, OpenAI, Gemini, Anthropic, MCP, Neo4j, FAISS, Pinecone

**Database**: MongoDB, PostgreSQL, MySQL

**DevOps**: Docker, AWS, CI/CD, Logging & Monitoring
